

# Satisfy Requirements & Improve Cybersecurity with our Cyber Insurance Stack

When cybersecurity insurance underwriters review your business, they have to evaluate and mitigate your existing risk. The more you can demonstrate you are taking key measures to protect your organization from ransomware, the better your chances of getting coverage with affordable premiums will be. Insurers look to see if you have in place several core baseline best practices: multifactor authentication (MFA) across systems, immutable backups, ongoing employee security awareness training that includes phishing prevention exercises, and managed detection and response (MDR) to protect your endpoints.

The CISO Global Basic Cybersecurity Stack offers services designed to ensure you meet these requirements, and we can customize our offerings to what you need.

## MFA: Multi-factor Authentication

CISO Global experts will:

- Help you configure MFA in platforms where it's already available
- Train your teams on why and how to use it
- Identify and implement additional solutions as needed

## Immutable Backups

CISO Global experts will:

- Evaluate your current backup strategy
- Identify security gaps that allow attackers to access your backups
- Help you align backup strategy to meet your unique recovery time objective

## Staff Cybersecurity Awareness & Phishing Prevention Training

CISO Global's fully managed training program includes:

- Quarterly simulated phishing attacks
- Monthly security awareness training emails
- Custom-selected training videos tailored to strengthen any identified weak areas over time
- Reporting on success and growth among staff over time
- Assurance you won't waste resources on another ineffective awareness training subscription

## MDR: Managed Detection and Response

CISO Global's MDR solution will:

- Stop endpoint attacks, even when endpoints are offline or outside your company network
- Provide 24x7x365 security monitoring and full response
- Go beyond alerts, with custom playbooks and automation to speed up processes
- Ensure all your system's security alerts are handled within minutes

### RISK & COMPLIANCE

- Gap Analysis
- Audit & Assessment
- Third-Party Risk Management
- FedRAMP & StateRAMP
- Compliance Support
- Risk Advisory Services
- Virtual CISO
- Managed GRC
- TIGRIS
- 25+ Security Frameworks Supported

### SECURITY OPERATIONS & INCIDENT RESPONSE

- Extended Detection & Response
- Managed Detection & Response
- Security Information & Event Management
- SOC as a Service
- Vulnerability Management Program
- Attack Surface Reduction
- Incident Response
- Digital Forensics
- Threat Intelligence

### SECURITY ARCHITECTURE & ENGINEERING

- Cloud Security
- Data Protection
- Remediation
- Secure Network Architecture
- Identity & Access Management
- Secured Managed Services

### SECURITY TESTING & CERTIFICATION TRAINING

- Penetration Testing
- Tabletop Exercises
- Training Programs
  - Security Testing Methodology
  - CMMC & Other Certifications
  - Security Awareness Training
- Red Team
- Purple Team
- Cloud, Network, Application, & Physical Pen Tests

## About Us

A leader in cybersecurity and compliance services, CISO Global brings together expert practitioners and thought leaders to provide tailored solutions that drive cyber resilience. The company's top-tier talent spans geographies, specialties, industries, regulatory frameworks, and focus areas and includes auditors, compliance specialists, certified forensics experts, ethical hackers, security engineers, and around-the-clock analysts.
